

Are you a patient of a Tandigm Health Physician?

The Tandigm Health Physician Network now includes hundreds of the region's top Primary Care Physicians, all dedicated to providing the finest care possible to over 100,000 patients across the Philadelphia Metropolitan five-county region.

Visit www.TandigmHealth.com and click the **Physician Network** link to find out if your physician — or one near you — is part of the Tandigm Physician Network, and able to offer our cost-free services.

At Tandigm Health, healthcare quality is at the heart of all that we do.

We define healthcare quality as ensuring the right care, at the right time, in the right place and in the right way, for each person and for one reason: **it's the right thing to do.**

Healthcare quality at Tandigm Health. Our motivation, our mission, our mark.

Health is on the way.™

We work with your Primary Care Physician to provide the quality healthcare you deserve.

Improving patient care

The healthcare system can be confusing, expensive, and frustrating. At Tandigm Health, we work with a network of Primary Care Physicians (PCPs) to prevent this from happening.

We provide resources and support that allow our PCPs to **focus more on their patients**, helping prevent small problems from becoming big ones.

Our team works hand-in-hand with families, care givers, and most importantly, you, **to help you get the right care at the right time.**

OUR EXPERIENCED TEAM INCLUDES:

PHYSICIANS

NURSES

SOCIAL WORKERS

CARE COORDINATORS

PHARMACISTS

Bringing quality care to you

Our clinical programs help patients continue on the path to improved health. They include:

- Meeting face-to-face with patients and their families to manage more complex and serious conditions
- Helping recently hospitalized patients transition to their homes and communities with confidence
- Educating patients on their condition and their care plan
- Assisting patients in understanding and managing their prescribed medications
- Supporting and addressing social and behavioral needs

Working with your PCP

- We equip practices with information that helps them focus on patients needing care, health screenings and hospitalizations
- We assign a dedicated team of experts who partner with practices to customize patient care
- When patients need our support, we make sure it's coordinated and consistent with the PCP's plan of care

We work with our PCPs every day to help you get patient-centered quality care so you **get healthy and stay healthy.**
